## Learning Points

### Using the Structure *I wish*

You use "*I wish ...*" to talk about things you do not have or do, or you cannot have or do. You use **wish**, the past form of the verb or the past participle of the verb to talk about imaginary situation in the present or in the future.

The verb *wish* introduces an idea. After *wish*, you use a verb in the past tense.

I wish I knew ...  
I wish I had ...  
I wish you were ...

Structure:

Wish + Simple Past tense

| Example                                | Meaning                                                   |
|----------------------------------------|-----------------------------------------------------------|
| <i>I wish Sally was here.</i>          | I would like Sally to be here, but she isn't going to be. |
| <i>I wish that you lived close by.</i> | I would like you to live close by, but you don't.         |

### Examples:

- *I wish I had some extra money with me.*
- *I wish ... that you lived close by, but you don't, sorry.*
- *I wish Sally was here, so she could say you were being a jerk.*
- *I wish you could come with us tonight.*

### Degrees of Necessity

You use the modals *must* and *have (got) to* to express necessities in the past or in the present.

You use the negative forms of the modals *need to* and *have to* to express absence of necessity in the past or in the present.

**Must** refers to a necessary condition that comes from the subject and may be directed at the subject or the person the subject is talking to or about. It is used to express a strong necessity.

Example:

*I must set up this online profile by tomorrow.*

*An ideal date must include good food.*

**Have (got) to** expresses external obligations, which come from outside of the subject. These may be rules and regulations over which the subject has no control. It is used to express necessity in a lower degree than with *must*.

## Learning Points

Example:

*My ideal date has to be tall, preferably.*

Absence of obligation is expressed with the **negative form of have to**, not with mustn't.

Example:

*My ideal date doesn't have to be well off.*

Absence of necessity can also be expressed by negative form of *need*. It is generally used as a main verb in the construction *don't need to*, but sometimes can be used as a modal, like *needn't*. The infinitive after the modal verb "needn't" is used without the particle "to".

Compare these sentences:

*You don't need to rush into a relationship right now.*

*You needn't rush into a relationship right now.*

Here is a list of modals of necessity:

| Modal    | Meaning                                 | Example                                                            |
|----------|-----------------------------------------|--------------------------------------------------------------------|
| have to  | necessity lack of necessity (negative)  | <i>You have to tell her. You don't have to make a reservation.</i> |
| must     | strong necessity prohibition (negative) | <i>We must meet after eight.</i>                                   |
| ought to | strong advisability                     | <i>You ought to tell her that you're not into her.</i>             |
| should   | strong advisability                     | <i>You should have set this girl straight a long time ago.</i>     |

### Examples:

- *You have to tell her to get lost.*
- *It has to be on Friday night.*
- *We must meet after eight because she has plans before then.*
- *You don't even have to make a reservation.*
- *You should have set this girl straight a long time ago.*
